

第1回論理的創薬センター・ワーキンググループ・キックオフ講演会

量子コンピューターの医学応用 Medical application of a quantum computer: D-Wave2

演者: Bo Ewald

D-Wave International Inc. President

Robert "Bo" Ewald leads D-Wave's global business as President, D-Wave International and is focused on customers, supporting and helping them use D-Wave systems.

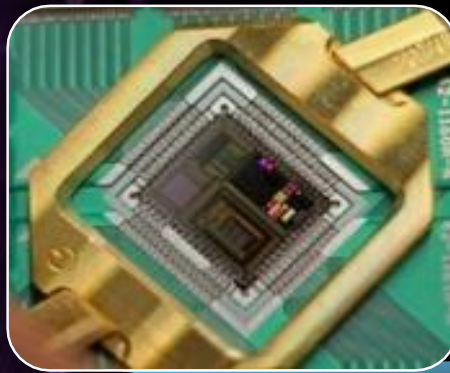

Mr. Ewald brings a long history with other pioneering technology organizations to D-Wave. He was at visualization and HPC leader SGI twice, most recently as CEO, and had a number of roles at supercomputing leader Cray Research including President, COO and CTO.

He has been the CEO and Chairman of several start-up companies including Perceptive Pixel, Linux Network and E-Stamp.

He started his technical career at the Los Alamos National Laboratory and was the Division Leader of Computing and Communications.

Mr. Ewald has participated on many industry and government panels and committees, including being appointed by the White House to the President's Information Technology Advisory Council.
